

# BUST RUST

## **Rust Converter** Chemically Converts Rust & Protects Surfaces

3X:Chemistry Rust Converter instantly neutralizes rust and converts the rusted surface to a dark, protective polymeric coating. The inert coating provides an excellent primer base that seals out moisture to prevent future rust and corrosion. Protected surface can now be top coated with most paints.

## **Rust Dissolver** Safely Removes Rust, Corrosion & Oxide Coatings

Rust Dissolver returns rusted surfaces to bare metal without harming the integrity of the metal. The viscous formula is reusable and will not harm plastic, rubber, seal, soft metals, or non-oxide coatings such as paint. Rust Dissolver works like an acid, but is safe for you and the environment. Rust Dissolver is ideal for removing rust from any part or surface that can remain damp with the product until the rust is gone!

## **Rust Blocker** Clear Rust Inhibitor for All Surfaces

Rust Blocker is a clear high performance durable coating that protects all metal, fiberglass, concrete and wood surfaces from rust and corrosion. Formulated with advanced Nanotechnology, it provides a superior bond to treated and non treated surfaces. Rust Blocker cleans up easily with solvent cleaner and can be top coated with most paints. Rust Blocker withstands temperatures up to 190°F with 2 or more coats and provides up to 7 years of permanent protection with regular inspections
